 FEMA - Region VII  
 MapMod all states status.wor  
 Mar 11, 2009

No Activity - FEMA does not have a DFIRM planned for the county/community.  
 Data Development - FEMA has contracted for approximate and detailed analysis, redelineation and digital conversion (where needed), and DFIRM production.  
 Preliminary FIS/DFIRM - A preliminary FIS/DFIRM is available for community and public comment. May be in 90-day appeal or 6-month compliance period.  
 Effective FIS/DFIRM - FIS and DFIRM are effective and available from Map Service Center.  
 Levee Note - Per procedure memo 34 and 43, the level of protection of accredited levees is required to be verified before a new FIRM may be released. In some cases, a community and levee owner will be allowed a 24 month period to provide certification documents.  
 Flood Recovery Maps - Following a Presidential Distater declaration, a new approximate analysis was completed to provide basic flood hazard data to the community. The data may be incorporated into a FIRM at a later date.
